Good morning Allen,

These documents are hardcopy. I would give you the original hardcopies we received in the mail.

Would you accept them if EPA were to mail them to you?

Thanks

Mark

Good Moring!

Yes, I would love a copy of those documents if for nothing else the expansion of my own knowledge about the project moving forward. I set up a SAFE link which you should receive in a separate email, so that you can drop them as I am sure it's probably a large amount of data space. Thank you!

Good morning Allen,

I am following up on the email communication from last week regarding old Donlin Gold Project documents.

Would the Corps be interested in the documents identified below?

Let me know by the end of this week.

If the Corps does not want them, EPA will dispose of them according to our records policy.

Thank you.

Mark

Good morning Ryan,

Hope all is well with you!

Jaime Hyslop was the last Project Manager for the Donlin Gold Project EIS. Since he is no longer with the Alaska District, do you have a staff contact?

The reason for this email is that I am finally organizing our documents for Donlin to either send records to NARA or shred them. Since EPA was not the lead for the Donlin EIS, I think most of our documents can be shredded.

However, I wanted to know if the Corps would like any of these older documents for your Administrative Records?

These are all hardcopy documents:

Donlin Creek Project NI 43-101 Technical Report, Southwest Alaska, U.S.

Date: February 5, 2008
Prepared for: NovaGold Resources, Inc.
Prepared by: NovaGold Resources Inc. Vancouver, BC
